Market wrap up

Benchmark equity indices closed mixed as investors were worried over India's GDP growth slowing to a 26-quarter low of 4.5% in Jul-Sep. This was despite a bullish trend in global markets due to an unexpected jump in China's manufacturing activity in November. Shares of market heavyweight Reliance Industries, and Bharti Airtel and Vodafone rose on news of steep tariff hikes, which led to a positive opening for benchmark indices.Nifty 50 closed at 12048.20, down 7.85 points or 0.07%, while the 30-stock Sensex closed 8.4% or 0.02% higher at 40802.17 points. The indices are consolidating at the current levels after their steep 9% gains in last three months

Global Market

Asian indices were down in early trade after US President Donald Trump announced that the country would be reinstating tariffs on steel and aluminium imports from Brazil and Argentina.Trump accused the two countries of "massive devaluation of their currencies," which he said is hurting US farmers. This sparked concerns over trade. Further, weak US manufacturing data weighed on investor sentiment. On Monday, Institute for Supply Management's manufacturing index showed that manufacturing activity in US continued to contract in November.

Market preview

Benchmark indices are seen moving in a narrow range TODAY as investors are unlikely to take aggressive positions until they see signs of a revival in government spending, improvement in liquidity with non-bank lenders, and news of progress in trade negotiations between the US and China.Caution ahead of the Reserve Bank of India's bi-monthly monetary policy later this week and the US Federal Reserve's policy review the week after could also keep investors on the sidelines. The Nifty 50 is seen testing 12100-point level, with support seen at 12000 points
